

The Second Annual UC Irvine High School Chemistry Teacher Day

The Second Annual High School Chemistry Teacher Day will be held at **UC Irvine** on **Saturday, March 14, 2020 from 9:00 am to 3:00 pm**. This year we hope to include a great variety of shorter presentations (10 to 30 minutes). The symposium will also offer numerous opportunities for informal sharing of ideas between attendees.

Topics for presentations include (but are not limited to):

- Lab activities, models, manipulatives, chemistry games
- Teaching with technology
- Activities that motivate students and promote scientific inquiry
- Transitioning to Next Generation Science Standards
- Chemical Demonstrations

The cost to attend the symposium is only **\$25**, which will include parking and lunch (the fee is reduced to **\$15** if you make a presentation!). Enrollment for this 1-day conference is **limited to 36 participants**. Online Registration is expected to open on **Feb 17, 2020** through the Orange County ACS website (ocacs.org).

The symposium will utilize a lecture room and a lab room that can accommodate wet lab presentations. Wi-Fi access will be available to allow participants to engage in web-based activities.

There's room in the program for you to share your ideas! To **volunteer as a presenter** or to **suggest topics** for the symposium, please complete this Google Form: <https://forms.gle/168AGmTTgGZ2DfvH7> .

For more information, please contact Steve Sogo, of Laguna Beach High School (ssogo@lbusd.org).
