

OCACS TECHNICAL PRESENTATIONS

(Virtually, again without dinner!)

Join the Orange County Section of the American Chemical Society

Online Meeting

Thursday, March 25, 2021

Zoom Presentation at 7:00 PM

*To obtain the **Zoom link** you must pre-register to ensure that only legitimate attendees will have access. Send an email to ocacs@sbcglobal.net by **NOON on Tuesday MARCH 23rd** to request access (do it now if you wish!) and the link will be sent directly to you personally.*

Two-dimensional Liquid Chromatography (2D-LC) for Various Applications

Dr. Guannan Li

Agilent Technologies, Inc.

Abstract

Two-dimensional liquid chromatography (2D-LC) has been gaining more and more interest from both academia and industries thanks to the evolution in instrumentation as well as software. Heart-cutting, comprehensive and high-resolution sampling are the three basic modes for 2D-LC. 2D-LC has been utilized for various applications including pharmaceutical, biopharmaceutical and food analysis. Here, we would like to focus on heart-cutting and high-resolution sampling modes, introduce automated solvent modulation (ASM) feature and give some examples for small and large molecules separations.

Biography

Dr. Guannan Li received her Ph.D. in medicinal chemistry from the University of Illinois at Chicago. She currently works at Agilent as an application scientist and supports HPLC, UHPLC, LCMS and SFC applications.

#### **Join an OCACS Committee**

One of the best ways to become involved, other than attending meetings, is to serve on one of the OCACS committees. These include Education, Awards, Programming, Younger Chemists, Kids & Chemistry, Women Chemists, Webmaster, Government Affairs, Membership, National Chemistry week, and Environment. We always need more volunteers. Please e-mail your interest to [ocacs@sbcglobal.net](mailto:ocacs@sbcglobal.net).
